REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Applicant's comparative data in the specification at Table 1 indicates unexpected results in physical properties including impact, chemical and heat resistance, fluidity and flame retardancy for the polyphenylene ether/liquid crystal polyester compositions as set forth in the present claims as compared to conventional polyphenylene ether/liquid crystal polyester of the prior art of record. The unexpected results are shown to be attributable specifically to the molecular weight distribution and ratio of polyphenylene ether to liquid crystal polyester as set forth in the present claims.

2. Prior art cited on form 892 provides technological background information.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
